

# Lollipop Instructions

To minimize breakage, we deliver your lollipop to you unassembled. It is very easy to put together. Just follow these simple instructions!

Your lollipop comes with a 4" personalized pot, saucer, and a pole with 1 threaded rod, 1 copper tube, 2 nuts and 2 washers.

1. Remove the nut and 1 washer at the top of the pole.
2. Place the saucer on the pole.
3. Place the pot on the pole.
4. Replace the washer and then the nut.
5. Insert the pole in the dirt of your large pot.

That's it! Told you there was nothing to it!

Some helpful suggestions:

When you insert the lollipop in the dirt of the large pot, make sure that it goes all the way to the bottom so the lollipop won't fall over. If you have just planted the large pot, it may be a good idea to water it once or twice before inserting the lollipop so the new dirt can settle and better support the weight of the lollipop. If your lollipop starts getting loose, just tighten the screws back up!
